YOUNG CHICKS

die of bowel trouble more than any other cause. It is estimated that of every 100 chicks hatched each year less than 400 reach marketable size. Germon's users raise, usually, 90% of chicks hatched. Germon's keeps the bowels regular. It prevents diarrhoea from overdrinking of water; from eating musty or spoiled food, etc. It should be given in drinking water twice a week from the day they are hatched. It stops the loos. Every chick that dies costs badly into the profit from the rest. Every chick saved will pay the cost of a bottle of Germon's. One size only, 50 cents, at dealer's or post paid.
